Career break (2024 – present): Focused on technical exploration, consulting, and community mentorship.

SUMMARY

Full stack engineer with 8+ years experience building scalable backend systems and modern web applications. Strong in Node/TypeScript, Rails, PostgreSQL, and cloud infrastructure. Experienced in ETL pipelines, API design, and data integrations. Seeking mid-to-senior level roles where I can contribute immediately and grow into technical leadership.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Ruby, C++, SQL (Postgres), PHP, HTML/CSS, SCSS

Frameworks: React, Node.js, Express, Next.js, WordPress, Rails, Sinatra, Flask

Libraries & Technologies: Redux, jQuery, Storybook, Lodash, pandas, NumPy, Puppeteer, Cheerio.js, Git, Docker, Google Cloud Platform, Kubernetes, Emscripten, GraphQL, REST API development, Jenkins, GitHub Actions

EXPERIENCE

Software Engineer

November 2021 – March 2024

Capital One

New York, NY

- Developed & maintained ETL pipeline processing partner data from CSV/JSON APIs into PostgreSQL database.
- Built React components and Node.js APIs for Capital One Shopping, implementing A/B tests to optimize engagement.
- Created Chrome extension scripts (Puppeteer, Cheerio.js) enabling compatibility with 100+ retailers, generating \$300K+ in user savings.
- Facilitated partner integrations expanding deal selection and increasing platform revenue.

Full Stack Developer

August 2017 – October 2021

Moonfarmer

Kingston, NY

- Led team of developers: conducted daily standups, mentored new hires, performed code reviews, and provided technical direction.
- Optimized Python data aggregation scripts for Johns Hopkins COVID Research Center, supporting 10K+ daily users during pandemic peak.
- Built RESTful APIs using Node/Express and Rails; deployed services via Docker, Kubernetes, and GCP.
- Developed React/Next.js applications with Redux state management; built custom admin dashboards with Rails and KeystoneJS.

SELECTED PROJECTS

Twitch & Discord Queue Bot | *TypeScript, Node, Express, React, GCP, Postgres*

Dec. 2022 – Feb. 2023

- Built Twitch and Discord bots managing real-time player queues for Pokémon raids, handling hundreds of concurrent users.
- Designed Node.js backend with PostgreSQL to track queues and automate invite distribution across separate GCP instances.
- Integrated chat commands and bot interactions for dynamic queue joining, plus subscriber-exclusive channel point redemptions.

EDUCATION

SUNY New Paltz

New Paltz, NY

Bachelor of Science in Computer Science

August 2013 – May 2017

VOLUNTEER EXPERIENCE

Robotics Mentor

August 2023 – Sep. 2025

Salesian High School

New Rochelle, NY

- Mentor high school students in robot design, coding, and engineering for FIRST Tech Challenge competitions.
- Manage team budget, fundraising, and community STEM outreach opportunities.
- Foster collaboration and problem-solving skills within student teams.
